

Price Quote: Water Business Record System for Shahid ullah shenwari

Client: Shahid ullah shenwari **Project Name:** Simple Digital System to Track Your Water Business **Total Cost (One-Time Payment):** 100,000 Pakistani Rupees (PKR) **Date:** 14 December 2025

1. What This System Solves

This system is built to stop two major problems in your business:

1. **Losing Expensive Bottles:** It always knows exactly where every big 5-gallon bottle is.
2. **Losing Money:** It keeps a perfect record of every sale and every customer who needs to pay you.

2. What You Get for 100,000 PKR

We will give you **one easy-to-use computer program (Web System)** that works for both your managers and your drivers. The drivers can use this same system on a tablet or smartphone web browser.

Tool: The Manager & Driver Digital Record System

This system is used on your office computer by the manager and on a phone/tablet by the driver.

What This Tool Does	Why This is Good for You
Bottle Counter (KEY)	It keeps a score for every office/bank. It tells you: "Bank A has 12 empty bottles that belong to you." It also lets the driver update this score instantly.
Customer List	All customer addresses and contact numbers are saved in one place.
Sales Record	Every time you deliver water, the system writes down the sale automatically.
Debt Alert	This shows a clear list of all the customers who owe you money and for how long.

How the Driver Uses It: When the driver is at the bank, they use their phone or tablet to access the system and simply click two buttons:

- **Button 1:** "I gave them [Number] full bottles."
- **Button 2:** "I took [Number] empty bottles back."
- **Result:** Your main record is instantly updated and the customer's bill is ready.

3. How the 100,000 PKR is Used

This price covers all the work needed to build, test, and teach you how to use the single web-based system.

Work Step	Cost (PKR)
1. Planning	We sit with you to understand your business and draw the plan.
2. Building the Web System	The time needed to write the computer code for the main system, including the complex Bottle Tracking and the simple screens for drivers. (This covers all functions.)
3. Training	We teach you and your staff how to use the system correctly.
TOTAL INVESTMENT	100,000 PKR

4. Simple Payment Plan

We break the payment into three easy parts:

Payment	Amount (PKR)	When You Pay
Payment 1 (Start)	30,000 PKR	When we start the project and begin planning.
Payment 2 (Mid-Way)	50,000 PKR	When the main Web System is finished and ready for you to see and test.
Payment 3 (Finish)	20,000 PKR	After the system is fully working and your staff is trained.

This system is the foundation for your business to grow without errors.
